## QAT Case Study/Success Story

### CA Gen 7.0 Upgrade to CA Gen 7.6 (.Net)

#### Customer Profile

**Industry:** State Government

#### Customer Overview

The customer was a state of government agency.

#### Business Challenge

The customer had a critical system which was developed in CA Gen 7.0 using CA's legacy renewal implemented by QAT.

#### Solution Description

QAT devised a solution to upgrade the customers CA Gen 7.0 development environment and runtime environments including 3rd party software to CA Gen 7.6 while on-going development changes were being made to the system. QAT provided project planning, project management, 3rd party infrastructure support/installation, actual upgrade of the CA Gen environments and application testing.

#### Business Impact

The customer successfully upgraded all their CA Gen system and infrastructure to CA Gen 7.6. The upgrade was performed under budget and on-time.
